**Technical Brochures**

Title:

**Test circuits for HVDC thyristor valves.**

## Abstracts

In conformity with the usual classification of the specified tests into two major categories, dielectric tests and operational tests, the report is in two parts : Part 1 - Dielectric tests which deals principally with test circuits for verifying the high voltage characteristics of the valve, and Part 2 - Operational tests, which deals principally with test circuits for verifying the turn-on, turn-off and current related characteristics of the valve.
