Title:  
**Thyristor controlled voltage regulators: Parts 1 and 2**

**File Size:**1,6 MB    **Pages NB:**70    **Study Committee :** B4    **WG (TF):** WG B4.35 **Year:** 2004

## Abstracts

A two part report containing three non-conventional methods of voltage regulation by reactive power control : voltage controlled static var compensator, shunt capacitor bank series shorting and special delta star switching. The second part explores the feasibility of static on-load transformer tap changers.
