Title:
The automation of new and existing substations: why and how

File Size:2,3 MB **Pages NB:**120 **Study Committee :** B5 **WG (TF):** WG B5.07 **Year:** 2004

Abstracts

.Discusses the impact of modern secondary equipment in substations to utilities. Overall and not individual functions are discussed. It applies to new substations as well as for refurbishment of secondary equipment in existing substations. The purpose is to assist engineers who have not yet had experience with modern secondary equipment. It provides useful information gained by utilities, manufacturers and system integrators
