Title:
Transmission Asset Risk Management - Progress in Application

File Size:2,4 MB **Pages NB:**90 **Study Committee :** C1 **WG (TF):** WG C1.25 **Year:** 2014

Abstracts

This TB provides insight into the application of Asset Management (AM), risk management and the information needed to prepare for future AM challenges. The TB contains several examples of AM analysis as applied to asset sustainment, an overview of data requirements and CIGRÉ work on development of failure statistics and an overview of risk-based methodologies for AM management decision-making.
