Title:

Control and automation systems for Electricity Distribution Networks (EDN) of the future

Abstracts

The objective of the Joint Working Group (JWG) C6/B5.25/CIGRED is the control and automation systems for the future electric networks with particular reference to the TSO/DSO interface. The Technical Brochure written by JWG is mainly focused to evaluate the level of automation and control necessary to better manage distribution networks with large penetrations of Distributed Energy Resources (DERs), as seen from both the TSO and DSO perspectives, and to provide services and information about the two level of management (i.e. at TSO and DSO level).
