Title:

Fundamentals on Hydrogen Supply Chain & Economics and its Impact upon CIGRE

Common alignment by all CIGRE board members on the developments, initiatives, plans and possible market/business transformation upon the electric power industry – as well as to cigre, which may result from the proximity of having feasible a scalable green hydrogen chain.

Scope:

- Molecules vs Electricity in future energy system
- H2 and CO2-free fuels
- H2 supply & end-uses
- Evolution of H2 production and consumption options
- Electrolyzers' economics
- H2 logistic & economics
- Infrastructures configuration & business cases
- Rationale of P2G and assessment of proposed initiatives
- Considerations for CIGRE work
